

The Preservation Trust of Vermont

2019-2020

VERMONT RESTORATION DIRECTORY

*East Poultney Schoolhouse,
1886, East Poultney, VT.*

The Preservation Trust of Vermont is pleased to present the

2019–2020 VERMONT RESTORATION DIRECTORY

We are fortunate to have a diverse collection of well cared for historic places in Vermont. We are equally fortunate to have a talented group of tradespersons, contractors and consultants who care for these historic properties and artifacts. The Preservation Trust would like to thank the individuals and businesses that support our work through a listing in the *Vermont Restoration Directory*.

Founded in 1980, the Preservation Trust of Vermont is a statewide, nonprofit organization that works with local partners to help save and use historic places and strengthen communities. We place particular emphasis on downtowns and village centers, encouraging a healthy mix of commercial, cultural, civic, sacred, and community gathering places. Rarely do we take on projects ourselves; rather, we work with local groups, supporting their efforts through a variety of programs.

We provide technical assistance through our Field Services Program and Grand Isle Lake House Retreats. We also provide grants to help with conditions assessments and restoration through our Robert Sincerbeaux Fund and in partnership with the Freeman Foundation. The Preservation Trust stewards historic preservation easements on over 90 buildings and properties throughout the state. Through support from the 1772 Foundation, we operate the Historic Places Revolving Fund with the goal of supporting community reinvestment in properties that are underutilized or threatened.

If you are considering or currently undertaking an historic preservation project in your community, feel free to give us a call. Staff at the Preservation Trust of Vermont would be happy to talk with you about your project. Contact us if we can help!

Preservation Retreats at the Grand Isle Lake House

“Having our project discussions in an environment like the Lake House turned out to be very important. It helped us feel not only like we were connected with resources to move our project forward, but also that we were personally re-energized and ready to tackle our challenges again.”

Jane Labun – President,
Newbury Woman’s Club

Accessibility and Maintenance Planning for Historic Buildings

Are you struggling with how to balance preserving the historic integrity of your building with meeting accessibility requirements? This retreat will explore the complex issues of providing accessibility while preserving the integrity and character of historic properties. It will also discuss maintenance planning for your historic property and explore the various resources available to help.

Arts & Cultural Heritage Retreat

A lot of energy and good ideas that flow when you put arts organizations in the same room with cultural heritage buffs. Whether the context is churches doubling as performance venues, historic sites hosting art installations, or industrial spaces being repurposed for community use, this retreat promises an interesting and inspiring mix of ideas.

Churches and Sacred Places

Churches and sacred places play a critical role in the health and wellness of our communities. They often act as overflow shelters for our most vulnerable citizens or as community gathering places for cultural performances or events. All the while, these buildings can be challenging to maintain. We will be joined by *Partners for Sacred Places*, a non-denominational nonprofit organization, to explore potential partnerships for existing churches and new uses for under-utilized church buildings.

Fundraising and Project Management

What are some techniques that community projects are doing to successfully fundraise while enhancing the use of their historic buildings? Christine Graham of CPG Fundraising will be on hand to provide training in the area of capital campaigns and annual giving. This retreat will also explore how to manage a rehabilitation project, work with grantors, contractors, and the community to assure success.

Historic Preservation and Community Development

The United Nations defines community development as “a process where community members come together to take collective action and generate solutions to common problems.” Historic Preservation plays an important role in community development, particularly when so much of Vermont’s preservation work is focused in our downtowns and village centers. This retreat is for municipalities, nonprofits, businesses, and community supported enterprises that are working on or exploring a building rehabilitation project or a project that strengthens community.

Libraries, Nonprofit Owned and Public Buildings

With a strain on town budgets, what help is there to assure that libraries, town halls, community centers and other critical facilities are maintained and well-used in an evolving environment? This retreat will explore some of the particular challenges and opportunities for libraries, nonprofit-owned and public buildings.

Why Preserve?

BY MEG CAMPBELL

For over thirty years, the Preservation Trust of Vermont has been helping communities save and reuse their historic places. We've provided grants large and small and connected groups to preservation resource experts. We've provided technical assistance, training and advocacy work. And we've helped celebrate success all over the state. Every now and then, though, it is helpful to take a step back and look at why we are so passionate about our work.

Preservation Connects the Past to the Future

Vermont's built environment is the tangible record of the stories of our predecessors. The history of our government, our schools, our civic structures and how we have lived over the last 200 years can be read in our buildings. These stories provide the underpinning of today's society and the anchor for tomorrow's. Preservation allows us today to honor the past, but also will allow future citizens of Vermont to continue to do the same.

Preservation is Local

In this global era, living a life that supports the local economy can be challenging. Restoring a historic building is the architectural equivalent of shopping locally. Restoration employs local trades people and managers, generally uses local dollars from local investors and funding sources, and in

many cases provides a relevant service to local residents. Using traditional materials to repair an existing structure is much friendlier on the environment than building new. Preservation is good for the world.

Preservation is Economic Development

Once a historic building is restored, other kinds of economic development follow. Fixing up a run down building on Main Street creates an interesting space for a small business. A coffee shop opens next door. People take notice of the old theater across the street and decide to mount a community effort to save it. Preserving one building can cascade into a bounty of other projects. Preservation makes places better, and better places thrive.

Preservation is Beautiful

As the old saying goes, "they just don't make 'em like they used to." The list of beautiful architectural features that are difficult if not impossible in today's world to reproduce is endless: elaborate doors, hand-wrought hardware, carved cornices, noble domes, wavy-glass windows, water-struck brick work, marble carvings and so much more. These things are beautiful and humans need beauty. Beauty keeps us calm and happy. Preservation is good for the soul.

Preservation is Community

The bulk of Vermont's traditional gathering places are in historic buildings in downtowns and village centers: town halls, churches, schools, general stores, shops and more. These are the places where you run into your neighbor, exchange the local news, and learn about upcoming events. In an increasingly digital age, maintaining real-time people-to-people connections is important. Preserving these places contributes to the dialogue and relationships necessary for a healthy community.

Preservation is People

There is no doubt that Vermont's built environment is architecturally rich. But behind the iconic red barns, white churches, noble civic edifices, spectacular residential structures, and occasionally stunning piece of unique construction, one thing remains: people. Every building holds a record of the people who built it and used it. And every preservation project today continues that thread with the people of today who care enough to bring it back, and the people of the future that will be well served by its very existence. Preservation is not about pickling; preservation is, above all, about people.

Preservation is Essential for a Vital Vermont

Vermont is a special place. While much of the rest of the country has lost valuable resources with modern development and sprawl, the essential character of our state remains intact. Working to preserve this character keeps our state vital. Preservation keeps Vermont, well, Vermont.

Attract, Keep, and Cultivate Volunteers for your Community Preservation Project

BY LISA RYAN

We are fortunate here in Vermont to have many people who are passionate about their communities and are willing to spend their time volunteering. People volunteer because it offers the chance to give back to the community and share their expertise. For others, it's an opportunity to spend time with people who share their interests. Still other volunteers are eager to develop new skills, gain fresh experience and acquire new knowledge. No matter what the reason, volunteers play a very important role in the preservation community and in restoration projects around the state. Here are a few tips to help you recruit and retain volunteers.

Youth Build in action at the Rise Up Bakery in Barre, VT

Make it fun — It is very likely that your volunteers enjoy meeting new people and making new friends. They may also have a love of old buildings or have some other personal connection to your project that inspired them to get involved. One way to help keep volunteers motivated, energized and engaged is to have fun. Volunteers who experience positive social interactions and have fun while working together on a project are more likely to stay with a project until the end and even recruit their friends, family and neighbors to help.

- Provide time for your volunteers to connect with one another in an informal setting to help spark new friendships.

- Look for opportunities to recognize inspiration, commitment and passion.
- Share meals, down time and deliberately provide opportunities for story sharing.
- Celebrate your success every step of the way!

Make it meaningful — If someone is willing to make a weekly or monthly commitment, it is very important that they know that their contribution is valued and is critical to the success of your project or organization. Establishing a well organized list of opportunities that encourages meaningful participation will help you both attract and retain volunteers.

- Consider developing volunteer job descriptions. This kind of clarity may help both your organization and your volunteer feel good about the project.
- Maintain a list of odd jobs such as gardening, photography, or painting. This can provide meaningful work for volunteers that might not be able to make a long-term commitment to the project.
- Keep track of your organizational needs such as administrative tasks, computer work, secretary or treasurer. Even if your current volunteer base doesn't have the skill you are seeking, they may know someone who does.

Show your appreciation — In our small state of Vermont, where many people are supporting their communities in a variety of ways, it is very important for your volunteers to know how much you appreciate the time they have dedicated to your organization or project. Take the time to recognize the unique contributions that each volunteer makes to your organization or project, no matter how big or small.

- Thank your volunteers personally both on a regular basis and after big efforts.
- Recognize your volunteers at meetings and public gatherings.
- Regularly highlight volunteer activity in your newsletter and on your website.
- Honor your volunteers with special recognition or awards at the end of the project.

The Importance of Community Engagement

Every preservation project has its own unique start. Some projects are identified as priorities during community planning processes, some begin as ideas floated over coffee at the local café. Regardless of where or how a project starts, a common central question is “How do we get people involved?” Community engagement is

an important part of any successful project, but all too often it is an afterthought in the planning process.

Start Early

One of the first questions you should ask yourself is “What does the community want or need from this building?” Don’t know the answer? Go ask!

Set up a booth at the farmers market, chat with neighbors at the transfer station, or send out an online survey and see what comes back. Never assume you know what the community wants, always take the time to ask.

Bring the Project to the People

People are busy. Rather than expecting people to come to you, send members of your committee out into the community. Do a presentation at an organization’s monthly meeting, set up an informational table at the local festival, and get on the agenda of Select Board and municipal commission meetings. Sometimes it’s just easier to join in on prescheduled events than it is to add new events to people’s calendars

Share Your Vision, Don’t Just Sell It

Too often our first venture out into the community is to sell them on a project and a lot of the time we find people have valid questions and concerns. Give people the opportunity to co-create, it allows them to take some ownership of the project.

Connect with the People Who Make Things Go

Every town has movers and shakers. Find the individuals in your community who can help build connections and consensus and make sure to bring them into the loop.

And the People Who Make Things Stop

We all feel like there are members of our communities that always have something negative to say about everything, but have we actually taken the time to sit down and listen to their concerns? Engage potential opponents early in the process and see if you can come to some kind of a solution to alleviate their concerns.

Build in Time for Engagement

There’s almost nothing worse than spending lots of time and money on plans, renderings, and documents, only to bring them to the public and be met with resistance. Build engagement into your project timeline so you get community feedback before you get too far along in your process.

Provide Options

There is no one-size-fits-all solution for community engagement; everyone will get involved in different ways. Make sure to find a group of dedicated volunteers to serve on the board or steering committee, but also have options for folks who want to get involved, but can’t commit to a board or monthly meetings. Having small, manageable task with concrete deadlines is a great way to include people that important talents but are weary of getting involved in a multi-phase or multi-year project.

Connect with Partners

It’s always important to remember that you’re not alone. Connect with similar projects to learn about their community engagement strategies, shortfalls and successes. If you feel stuck, reach out to PTV or other Preservation Partners for recommendations or assistance.

Most Important

Have fun with it and always remember to say thank you!

Fundraising for Preservation Projects

BY LISA RYAN

For some, the idea of fundraising is intimidating. Many people feel awkward or self-conscious asking others for money. Believe it or not, fundraising for your historic preservation project can be both an enjoyable and rewarding way to connect with your community and build support. Here are a few tips to help you get started.

Know your project and have a clear understanding of why it is important to you.

The first step to developing a successful fundraising campaign for your historic preservation project is to have a clear idea of what needs to be done. Once you have a solid scope of work established, you can then communicate your plan to individuals, funding agencies and foundations. Before sharing your plan with the public it is important to understand why you and

your group believe the project is important. It is likely you will discover that even within your team, there are many reasons why people care about the project and are willing to give. For some, it is aesthetic, for others there may be a more personal connection to the building or an event that took place there. If you are

able to share your own motivations and interests and have a clear plan established, you will be well positioned to ask the community for support.

Think broadly about potential supporters and know how much you need to raise.

Setting a fundraising goal will help you to put together a list of potential donors. While some of your funding may come from grant sources, a good percentage will likely need to be raised from individuals. This group of individuals may include family members, friends, neighbors, local business people, alumni, or owners of businesses that you frequent and support. Encourage your fundraising team or board to provide a list of names and consider the giving capacity of each person. Think of your fundraising list as a pyramid with your largest donors at the top. Do you have any potential donors at the \$1000, \$5,000 or \$10,000 level? For larger donors, offer to meet

with them in person and share your vision for the project. Let them know your goal and ask them if they would be willing to support the project at a specific level. Remember, you are not asking for yourself, you are asking them to support the goal of the plan you have shared with them.

Find many ways to share your information with the public.

Now that you have some of your larger donations in hand, you can confidently reach out to a broader audience for support. A good fundraising letter can go a long way, but you may also consider working with your local newspaper to share information about your project. Invite the press to visit while your building is being restored or during volunteer events. Share photos and submit press releases to local newsletters or newspapers. If your community uses Front Porch Forum or Facebook, these social media sites can be a great way to share information as well. You may even want to leave a binder with photos and updates at the local library for interested patrons who are not online. If your community has a local radio station, consider talking about your project on the air. You may also want to follow up your fundraising letter with a phone call. It is amazing how much you will learn from your community and how much support you can garner from talking with people about your project.

Say Thank You!

Every donor at every level is significant! You might consider printing thank you cards with a photo or artistic rendering of your project. Include a personal note and if possible, have each member of your fundraising group include their signature. Thanking people publicly as the donations are received may also help you attract new supporters. Seeing who has given may motivate others to give as well. People will also be motivated by your success and inspired by the generosity of others.

And last but not least....

Celebrate your success! Having a community celebration is a great way to honor the people who contributed to your project and to invite the public to share in your achievements.

Grand Isle Lake House*

Procuring Contractors and Materials for your Preservation Project

BY ERIC GILBERTSON

If you are using federal or state funds for your historic preservation project, there are most likely specific conditions for purchasing supplies and hiring contractors. The term for this process is “procurement.”

There are two goals that grantees and grantors share: to get qualified contractors on the job and to get the best value for the money being spent. This may not be the lowest price. The procurement process assures that qualified contractors are given a fair opportunity to compete. Keep good records of your procurement process. It is generally good practice and may be required to request bids from three or more contractors.

If an organization has received multiple grants for the same project, there may be different conditions associated with each grant and coordination can seem confusing. Fortunately, grants managers are eager to help you and are probably well aware of one another’s requirements. Be sure to contact your grantor and ask for help or clarification if needed!

Start by carefully reading your grant agreement(s) and map out a strategy for procurement. The amount of the grant determines the required process. Large grants may require plans, specifications,

and a formal bid process that encourages hiring disadvantaged- or women-owned businesses and, in the case of HUD housing and community development grants, “Section 3” low or very low income residents. Other grants require a simpler, straightforward process that assures that qualified contractors will meet preservation standards at a competitive cost.

Request for Proposals is the most typical avenue for procurement. A clear work description, pre-approved by your grant funder(s), is an essential part of a Request for Proposals that enables contractors to bid on the defined work and arrive

at accurate prices. If, for example, the work is repairing the foundation, the description can be as simple as a description of the foundation materials and how much is to be repaired. The Request for Proposals should ask contractors to respond with a detailed description of how the work will be done.

Some useful phrases to include are: “The work must meet the Secretary of Interior’s Standards for Rehabilitation of Historic Properties.” These Standards are available at www.nps.gov/hps/tps/standguide/rehab/rehab_standards.htm and include guidelines that help to explain specific application of the Standards. Another useful phrase is: “All work must match the original in materials, joinery, workmanship and finish.” For masonry projects: “All masonry repairs must use bricks and mortar that match the original in composition, hardness, porosity, color, application, pattern, and tooling.” If a Conditions Assessment of the building was done, it will provide language for the work description. (The Preservation Trust of Vermont can help with assessments, see page 2.)

Choice of a contractor is not based on price alone. Other criteria may include availability, knowledge of the building, or demonstrated ability to do similar work. If the lowest price is not selected by the grantee, there must be a good reason. For example, if the price from a contractor that has previously done good work on the building is only slightly higher than the other proposals, then it is reasonable to choose that contractor.

Be sure to discuss your selection with your grantor before notifying the contractor. In general, the selection of a contractor is up to the grantee, but the grantor will want to know the contractor’s qualifications and may request that certain standards be included in the final contract. For some grants, the final approval is a condition in the grant agreement.

Procurement is part of any grant process. Try to keep it simple, work with the grantor, and the process will go smoothly. Above all, don’t start your project until you are sure that all of the grantor requirements have been met.

Pawlet Library, Pawlet, VT

Ten Tips on Managing a Historic Preservation Project

As you start down the path of saving and using your historic building, here are a few tips to help you along the way:

1. **Always thank your contributors**, whether you received a gift from an individual, a nonprofit organization, a state agency or a foundation—a thank you to donors is the #1 tip.
2. **Keep careful records about your project.** Maintain a list of contributors and the chronology of your effort. You'll need this information to tell the story of your success.
3. Make sure that everyone connected with your effort **knows the history and chronology of the project.** They should also know who contributed.
4. **Involve as many people as possible** in the effort. Teams do work!
5. Saving great historic buildings is hard work, **so be sure to find ways to have fun** along the way. We can tell what other organizations have done.
6. **Find an important use for the finished building.** The more the building is used, the more people will appreciate it and help maintain it over the long term.
7. When hiring an architect and contractor, **be sure to get people who appreciate old buildings** and have a lot of experience working on them. Visit some of the buildings they have worked on.
8. If you are lucky enough to receive a grant, **be sure to understand and follow all of the conditions** required by the donor. Mark your calendar for dates when reports are due and be sure to submit them on time. Be sure to say thank you!
9. **Keep in touch with your supporters.** Let them know how the effort is moving along. If you're having a problem, let them know. They may have suggestions.
10. **Publicize your progress.** When you receive a grant or large donation, celebrate by letting the local paper, radio station, and television know. Be sure to recognize the donor, and be sure to get their name right!

www.blackriverdesign.com

The historic Fairbanks family mansion known as Brantview was carefully updated and adapted to serve as a welcoming dormitory for generations to come. See the full description and gallery of photos at blackriverdesign.com/brantview

For almost 40 years, Black River Design, Architects has been finding creative ways to restore life to Vermont's historic buildings while resolving building code, preservation, funding, and energy efficiency requirements. Notable projects include addition/renovations, adaptive reuse, and deep energy retrofits at Brantview in St. Johnsbury, the French Block in Montpelier, the Vermont History Center in Barre, and many more.

Bread Loaf Corporation

Contact: Jim Pulver, VP Architecture
1293 Route 7 South
Middlebury, VT 05753
802-388-9871
jpulver@breadloaf.com
www.breadloaf.com

Bread Loaf provides integrated planning, design and construction services for clients seeking to create the highest level of historic and sustainable buildings. Our team of historic preservation specialists, architects, engineers, construction managers, cost estimators and LEED Accredited Professionals takes a holistic approach to finding innovative solutions to historic preservation projects.

The fully renovated Hartford Town Hall embraces its historic past while celebrating the modern era in which it was reconstructed. The project was designed and built by Bread Loaf Corporation, which renovated this 1884 former school into a modern, highly efficient Town Office space that is a Net Zero ready building.

802-447-8609
802-448-5694
mail@clarch.com
www.clarch.com

The 1886 Park-McCullough House is one of the premier historic sites in Southern Vermont and the project goal was to make the barn – their main banquet area – usable throughout the entire year in a manner that is compatible with preservation of historic fabric and style of the buildings and grounds. Strict attention and care was given to the character of the listing spaces so as not to detract from the historic significance of the property.

Centerline is an award winning architectural firm located in Bennington and Burlington Vermont. Since 1989, we have offered a full range of planning and architectural design services. Centerline's approach to historic preservation is all about balance. The key to successful preservation of a structure is to identify the key historic components and the key programmatic requirements and blending those into an integrated solutions. A useful building can last forever.

Granville, VT 05747
802-767-3569
802-363-0936
mike@mikeeramomasonry.com
www.mikeeramomasonry.com

Many 18th and 19th century New England buildings include some form of masonry in the structure. Repair and restoration of these buildings requires knowledge and skill to stabilize the sometimes sensitive structural elements, while maintaining the period aesthetic. Mike Eramo Masonry has extensive experience with New England masonry restoration projects.

NBF Architects, PC

Contact: Ralph Nimtzt
24½ Center Street
Rutland, VT 05701
802-775-3168
rnimtzt@nbfarchitects.com
www.nbfarchitects.com

NBF Architects was hired to convert the historic Keewaydin Manor House into year-round office spaces for the Foundation staff. The design restored the third floor of the building and widened the existing dormers to create a bright, open office space. A one story addition was constructed on the north end of the manor house to provide an additional entrance, mudroom, and storage.

NBF Architects is committed to the preservation of Vermont's historic buildings. We have been fortunate to participate in many projects throughout the state and are particularly proud of our work on significant buildings in downtown Rutland. We enjoy contributing to projects that have a positive impact on our community and our Vermont way of life.

Windows & Doors By Brownell

Contact: Marc Bourdeau
800-Marshall Avenue, Suite 50
Williston, VT 05495
802-862-4800
marc@wdbrownell.com
www.wdbrownell.com/

At Windows & Doors By Brownell our trade services include free job site consultations to assist in ensuring the perfect fit.

When historic windows are sufficiently deteriorated and replacements are the only solution, contact us. Our professionals have the experience and attention to detail to recreate windows that will maintain the building's original aesthetic. Exclusively partnered with Marvin Windows and Doors, an industry leader in historic renovation, we can recreate historic profiles and wood-work

details in wood or low-maintenance aluminum clad products that are also high performing and energy-efficient.

PRESERVATION PARTNERS

Historic New England

Contact: Charlotte Barrett,
Community Preservation Manager,
Western New England
802-989-4723

cbarrett@HistoricNewEngland.org

Historic New England
One Lawson Lane, Suite 200B
Burlington, Vermont 05401
www.HistoricNewEngland.org

Historic New England, the oldest and largest regional heritage organization in the nation, shares the region's history through extensive collections and archives, publications, public programs, and museum properties that document more than four hundred years of life in New England. It owns and operates historic sites in five states. Through its Everyone's History program, it partners with communities and organizations throughout the region to collect and share their stories through exhibitions, public programs, publications, and films. It works with historic homeowners to ensure preservation of their homes in perpetuity through its Preservation Easement program. The Community Preservation Grant program annually awards \$1000 grants to a small-to mid-sized heritage organization in each of the six New England states.

National Trust for Historic Preservation

2600 Virginia Avenue NW, Suite 1100
Washington, DC 20037

www.PreservationNation.org
www.SavingPlaces.org

The National Trust, a privately-funded nonprofit organization, works to save America's historic places. Chartered by Congress in 1949, the organization is now supported entirely by private contributions. We take action when historic buildings and sites are threatened, helping to build vibrant, sustainable communities. We advocate with governments to save America's heritage. We strive to create a cultural legacy as diverse as the nation

itself so that we all take pride in our part of the American story. The National Trust is based at headquarters in Washington, DC, in field offices nationwide, and at historic sites in 15 states. The National Trust's field offices focus on place-based preservation through the Trust's National Treasures program. For more information on National Treasures visit www.savingplaces.org.

Preservation Burlington

PO Box 481
Burlington, VT 05402
info@preservationburlington.org
www.preservationburlington.org

Preservation Burlington is the Queen City's local historic preservation nonprofit. The mission focuses on civic, education, and charitable purposes and to preserve as well as improve traditional neighborhoods, the architectural, historic, and aesthetic qualities, and the economic vitality of the city of Burlington.

Benjamin.Doyle@vt.usda.gov
87 State Street, Suite 324
PO Box 249
Montpelier, VT 05601
www.rd.usda.gov/vt

USDA Rural Development works to strengthen rural communities through investing in economic development, affordable housing, and community infrastructure. The agency offers affordable loan and grant financing for the repair and rehabilitation of essential community facilities including town halls, libraries, historic buildings, and community centers. Projects include accessibility modifications, energy efficiency upgrades, and facility preservation and expansion.

Vermont Arts Council

Contact: Michele Bailey
802-828-3294
mbailey@vermontartscouncil.org
136 State Street
Montpelier, VT 05633
www.vermontartscouncil.org

The Vermont Arts Council administers the Cultural Facilities Grant Program in conjunction with the Vermont Historical Society and the Vermont Division for

PRESERVATION PARTNERS

Historic Preservation. The program awards grants on a competitive basis to assist nonprofit organizations and municipalities to improve community facilities used to provide cultural activities to the public. The purpose of the program is to enhance or expand the capacity of an existing building to provide cultural programming. More information can be found on the Council's website.

The Vermont Community Development Program

Contact: Cindy Blondin,
Grants Management Specialist
802-828-5219
cindy.blondin@vermont.gov

1 National Life Drive
Davis Building, 6th Floor
Montpelier, VT 05602-0501
<https://accd.vermont.gov/community-development/funding-incentives/vcdp>

The Vermont Community Development Program (VCDP) assists communities on a competitive basis by providing financial and technical assistance to identify and address local needs in the areas of housing, economic development, public facilities, public services, and handicapped accessibility modifications. VCDP funds must primarily benefit persons of low and moderate income. In addition, assistance is provided to communities for threats of health and safety issues as urgent needs and slums and blight projects.

Vermont Community Foundation

Contact: Celia Cadwell,
Program and Grants Specialist
802-388-3355 ext. 222
ccadwell@vermontcf.org

3 Court Street
Middlebury, VT 05753
www.vermontcf.org

The Vermont Community Foundation works to build healthy and vital Vermont communities through grantmaking, Vermont investments, and philanthropic services. Although the Foundation typically does not fund capital campaigns through our competitive grantmaking, we do fund opportunities for volunteers to engage with local historic preservation

projects and we are always happy to learn more about your work. Visit our website for more information or contact us.

Vermont Downtown and Village Center Program

Department of Housing and
Community Development
One National Life Drive, Floor 6
Montpelier, VT 05620

Downtown Program:
Gary Holloway 802-828-3220
gary.holloway@vermont.gov

Village Program:
Richard Amore 802-828-5229
richard.amore@vermont.gov
www.accd.vermont.gov/community-development/designation-programs/village-centers

The Department of Housing and Community Development recognizes and supports local revitalization efforts across the state through the Designated Downtown and Village Program. This incentive program offers resources including tax credits and grants, specialized training, and funding to help build and foster strong communities. Building on each community's unique history, these local efforts have demonstrated how revitalization builds the local economy, while supporting growth in a way that minimizes environmental impacts and preserves the historic character and identity of our Vermont Downtowns and Villages.

Vermont Division for Historic Preservation

Contact: Laura Trieschmann,
State Historic Preservation Officer
802-828-3222
laura.trieschmann@vermont.gov

Caitlin Corkins,
Tax Credits and Grants Coordinator

caitlin.corkins@vermont.gov

1 National Life Drive
Davis Building, 6th Floor
Montpelier, VT 05620-0501
www.accd.vermont.gov/historic-preservation

As Vermont's State Historic Preservation Office (SHPO), the division maintains the State and National Registers of Historic Places, offers grants for historic community and agricultural buildings, maintains Certified Local Government partnerships, reviews federal rehabilitation tax credits, evaluates federal and state projects, provides technical assistance, and operates the state-owned historic sites.

Vermont Housing and Conservation Board

Contact: Karen Freeman
802-828-5067
kfreeman@vhcb.org

58 East State Street
Montpelier, VT 05602
www.vhcb.org

VHCB offers feasibility and project funding for the conservation of agricultural, forest and recreational lands, natural areas, historic resources (acquisition and rehabilitation), archeological sites, and for the development of housing for low and moderate-income households. Municipalities, nonprofit organizations, and certain state agencies are eligible to apply and the Preservation Trust of Vermont is VHCB's stewardship partner on every historic project.

Interfaith Power and Light

Contact: Ms. Betsy Hardy, Coordinator
802-434-3397
info@vtipl.org

PO Box 209
Richmond, VT 05477
www.vtipl.org

Vermont Interfaith Power and Light (VTIPL) is a state-wide, 501c(3) with the goal of moving Vermont's faith communities toward responsible stewardship of Creation by reducing their greenhouse gas emissions. One of the services that VTIPL offers is an on-site energy assessment of religious buildings to identify and prioritize opportunities for energy efficiency. There is no charge for this service; however, faith communities are expected to take some action in support of VTIPL's goal.
